Exp.No:12 Determination and plotting of magnetic and electric field intensity due to infinite long conductor at any specific point located at H

Aim: To write program for Magnetic field intensity of infinite long conductor using SCILAB.

Software required: SCILAB version 6.0.1

Practical output:

```
Scilab 6.1.1 Console
File  Edit  Control  Applications  ?
Scilab 6.1.1 Console

Enter i value: 3

Enter r value: 4

   "Magnetic field"

    0.1194268
Enter lambda value: 6

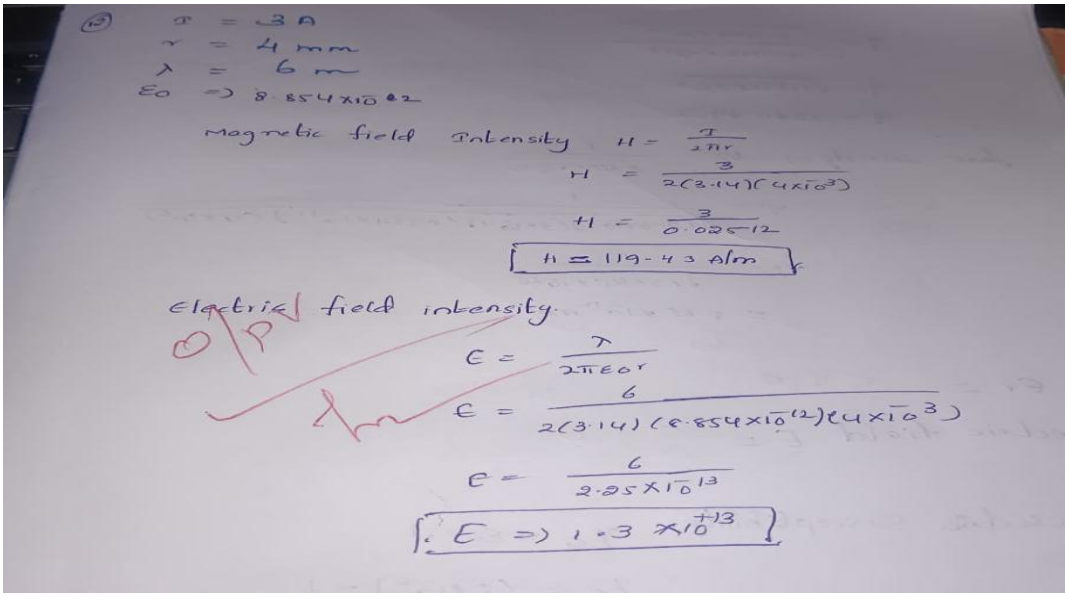

Enter r value: 4

   "Electric field"

    2.698D+10

-->
```

Theoritical Output:

Result :

Thus the program was verified for Magnetic field intensities in ferromagnetic materials using

SCILAB was successfully.
